

A**B**

Figure 2 – figure supplement 2: Unit locations. The locations of all recorded units in AC-PC coordinates (A) and coordinates normalized to the electrophysiologic entry point of STN (Sharott et al., 2014) (B). Positive numbers are lateral, anterior, and superior on the x-, y-, and z-axes, respectively. N_s and N_u indicate the number of subjects and number of units represented. Coordinates were not available for eight units. Units recorded from the same location are offset a small distance for display purposes.
