**Figure 1—figure supplement 1. Gross images of the discs and overview of proteomic data.**

(A) Gross images of the young and aged cadaveric discs. (B) Proteome-wide distributions per profile across all 66 profiles. The profiles were named with levels, ages, directions, and compartments. (C)–(E) Venn diagrams of detected proteins among the four major IVD compartments (OAF, IAF, NP/IAF, and NP), per age-group, and per protein category.
