

Figure 7–Figure supplement 2. Analysis of dendrites in additional sleep-regulatory circuits.

(A) Adult brains from control animals and *inc*¹ mutants expressing *UAS-DenMark-smGdpV5* in PDF and CRZ neurons, stained with anti-GFP (cyan). Scale bars, 100 μ m. (B) Quantification of dendritic volume. Bars represent mean \pm SEM. n = 9–10 (PDF); n = 14–17 (CRZ). ns, p > 0.05, Welch's t-test.
