

Figure 5 – figure supplement 1. Cell volume and sphericity of SMC and SMC neighbors in *katanin*.

Comparison of volume and sphericity of L2,L3 apical domain cells in wild-type (WT, *Ws-4*) and *katanin* (*kat*, *bot1.7* allele). Mann Whitney U test was used to assess the differences between genotypes for the mean cell volume and sphericity visualized by boxplots. Related to [Figure 5B](#).
