

A

 $N^0$ 

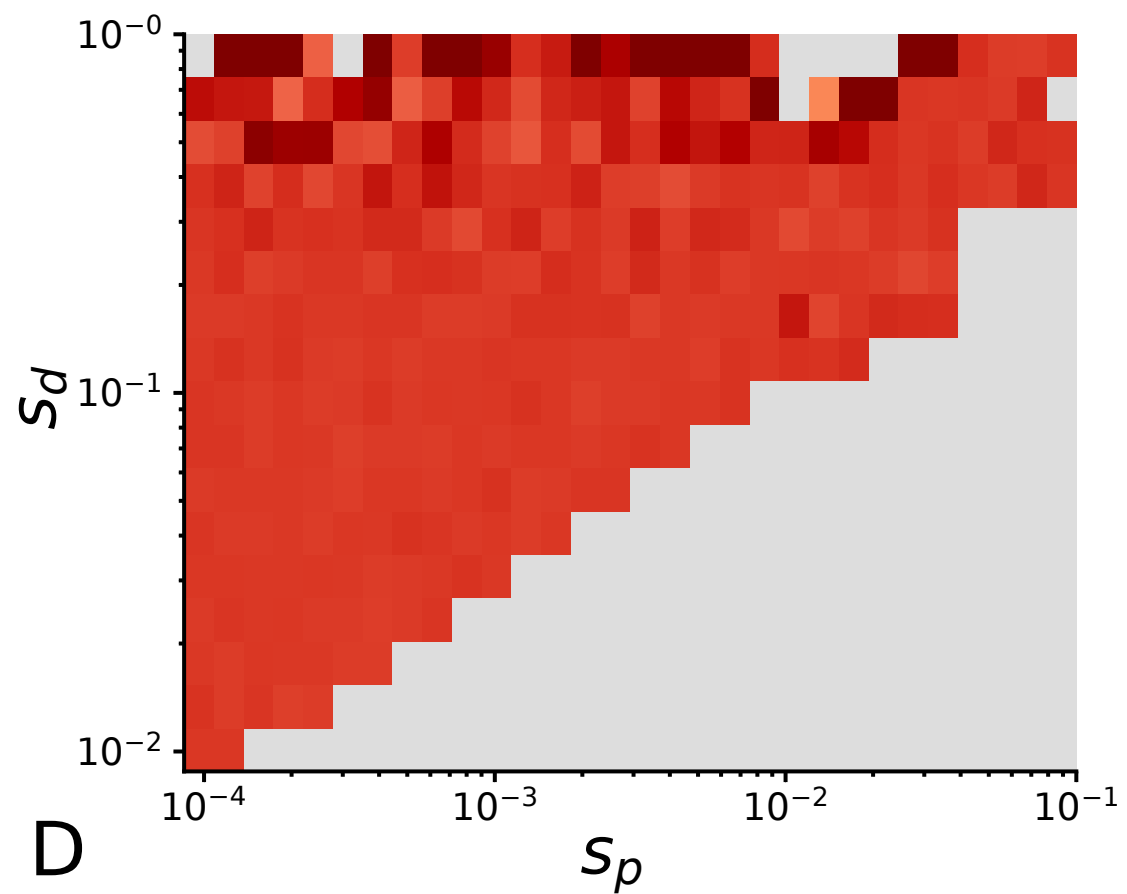

1 Cell                      10                      100

B

Age-Incidence Shape Parameter ( $k$ )

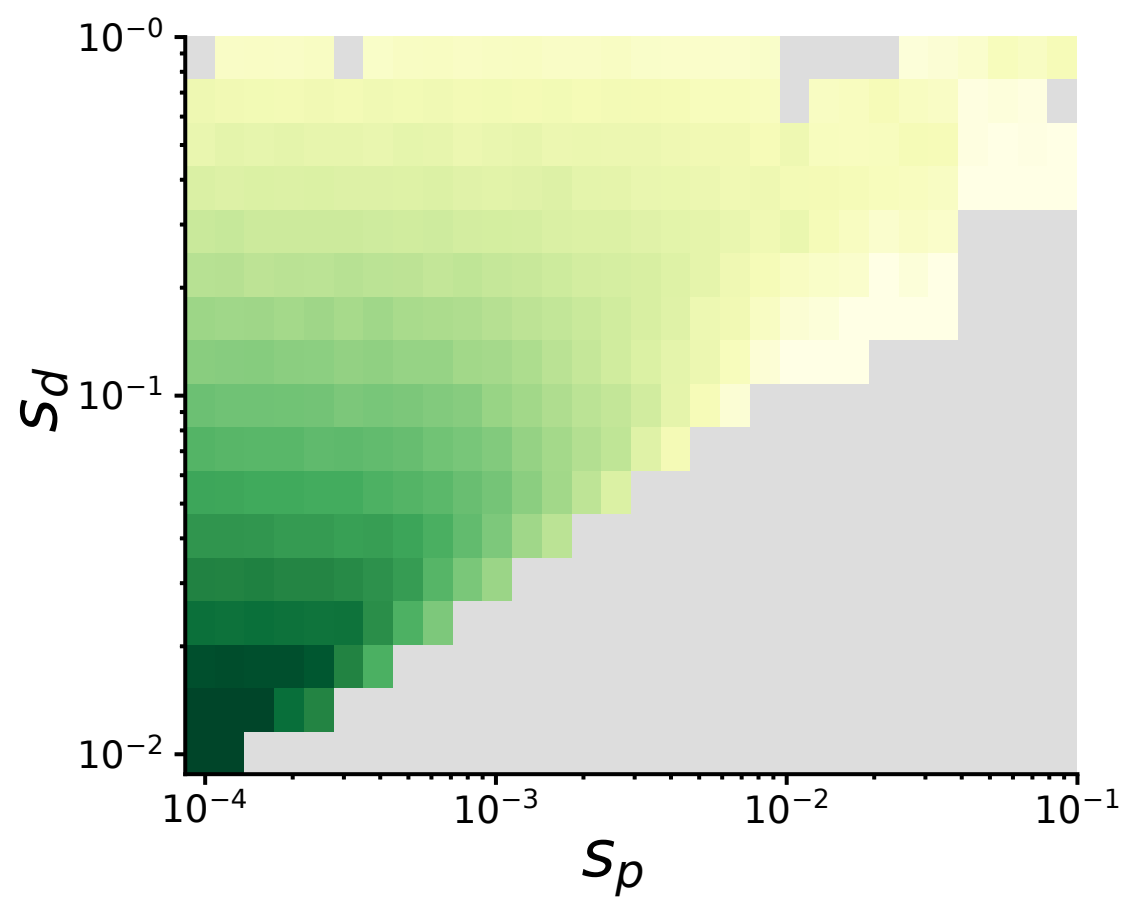

1                      2                      4                      8                      16                      32

C

Mutational Burden Shape Parameter ( $n$ )

1                      2                      4                      8                      16

D

Mutational Burden Scale Parameter ( $p$ )

0                      0.01                      0.02                      0.03                      0.04                      0.05
