

Figure 8–figure supplement 1

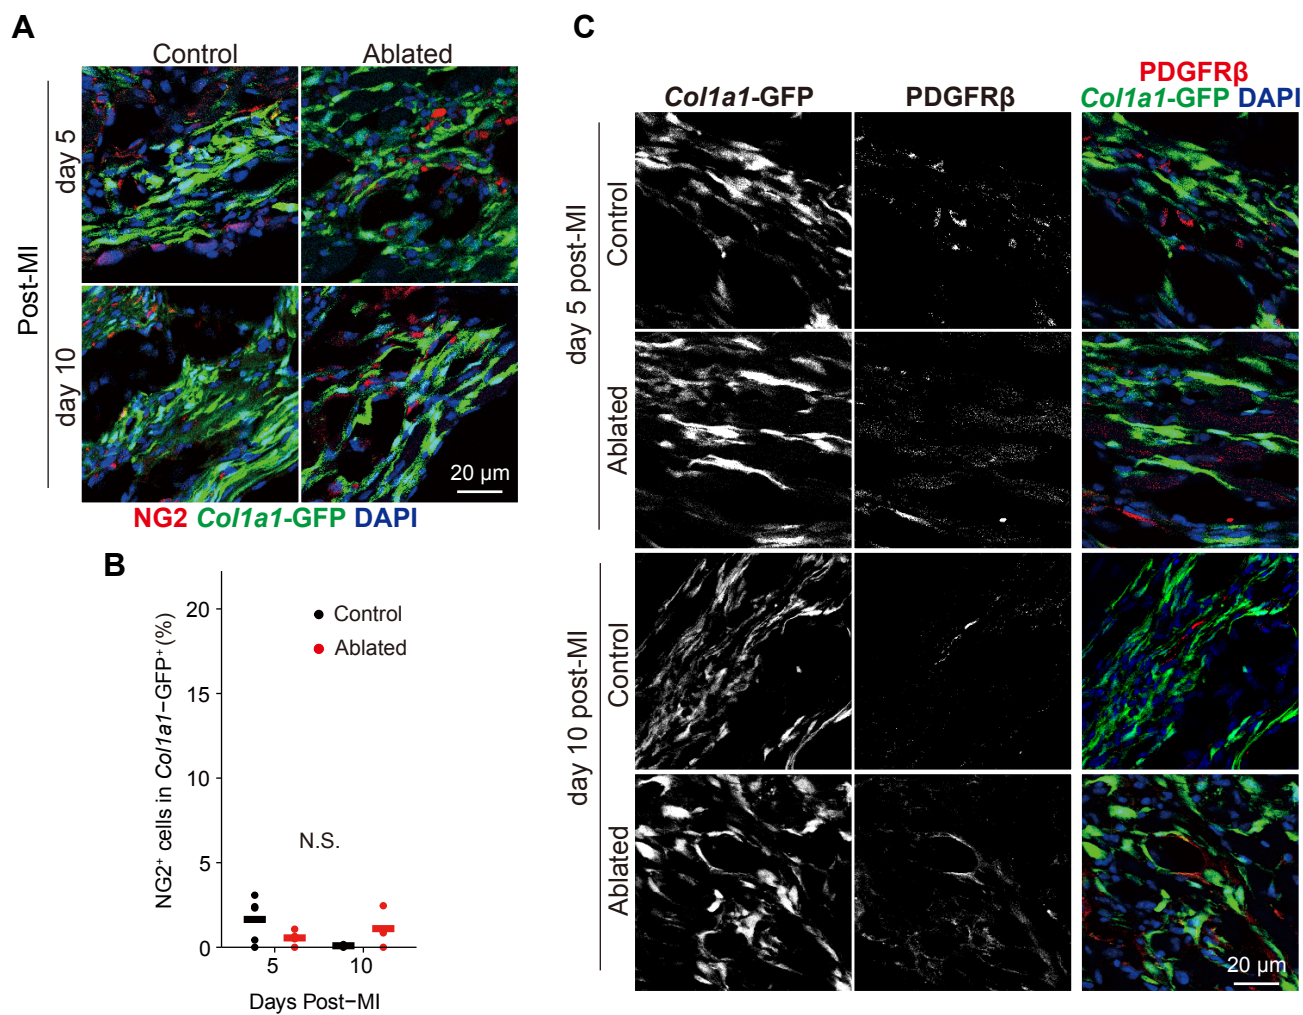

Figure 8–figure supplement 1. Mural cell contribution after MI. (A, B) NG2 and (C) PDGFR β lineage expansion at the indicated time points. Representative of immunostaining images are shown in A and C. Control: n=4, 3; ablated: n=4, 3 (5 and 10 days post-MI, respectively). Statistical significance was determined by a two-way ANOVA with Tukey test. ns: not significant.
