

Figure 4–figure supplement 1

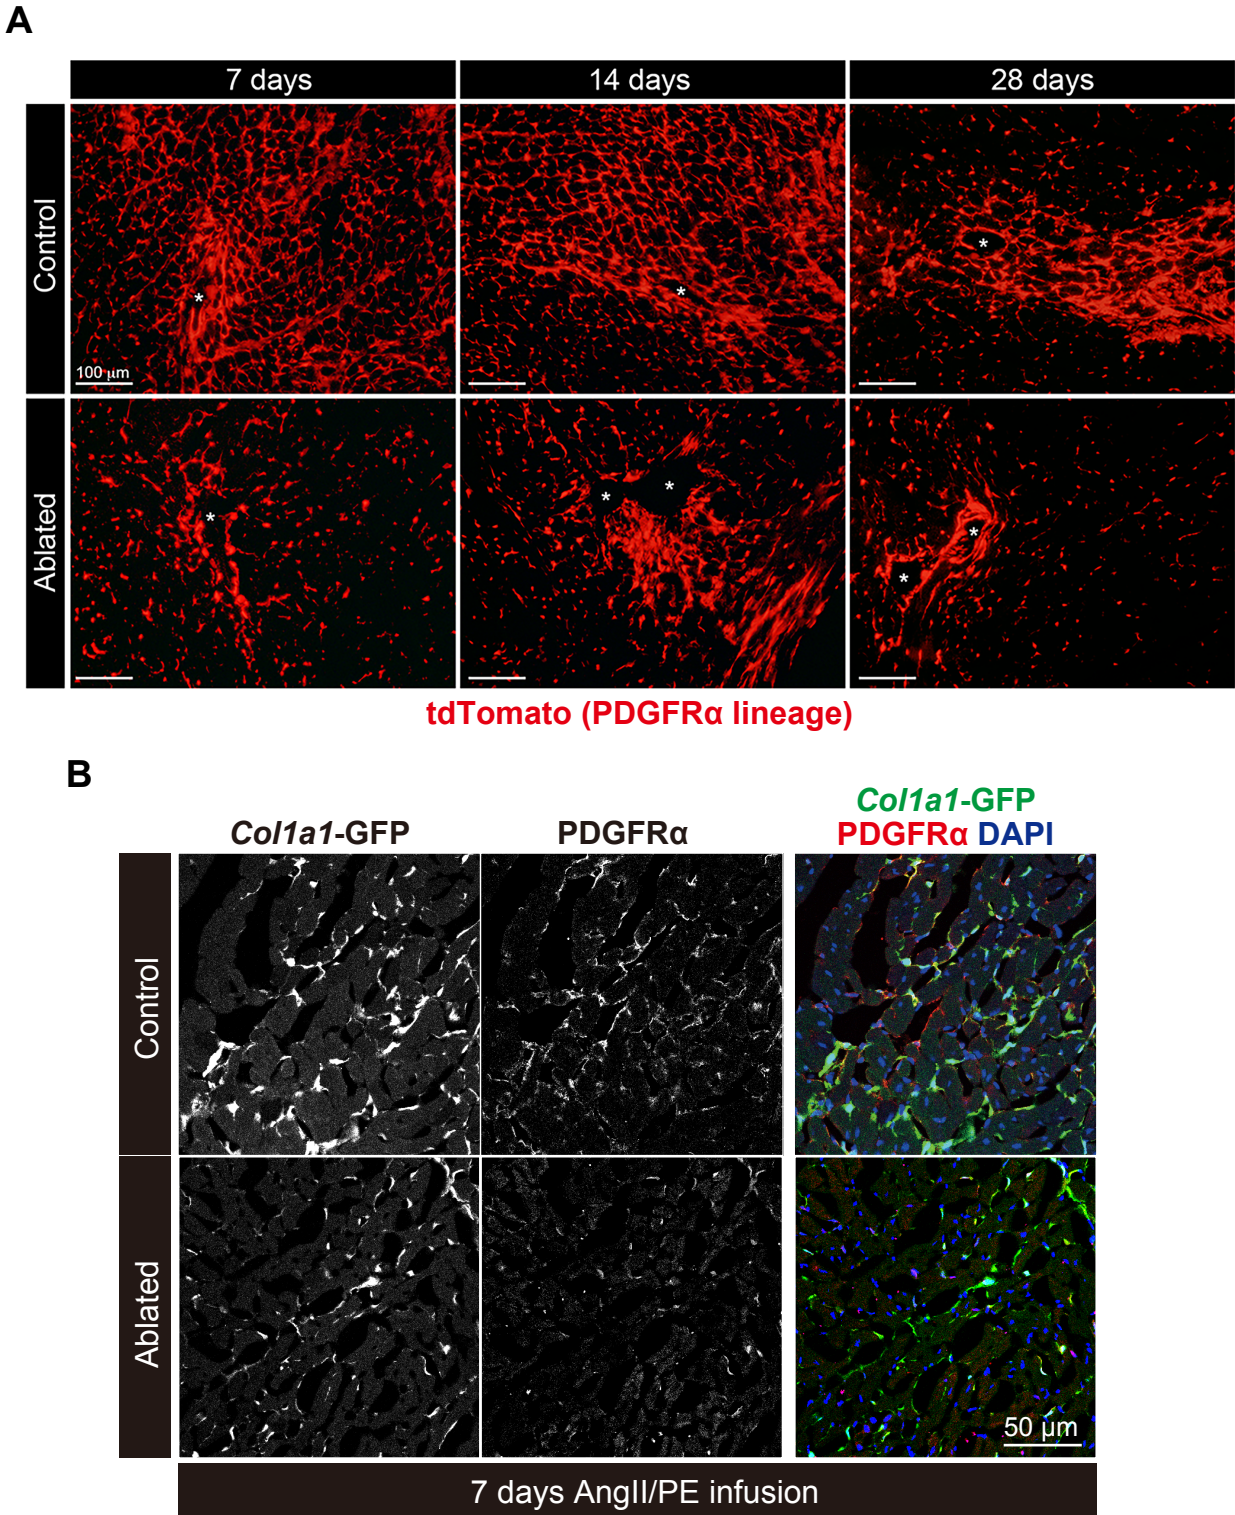

Figure 4–figure supplement 1. Fibroblast expansion after AngII/PE infusion. (A) PDGFR α cell expansion after AngII/PE infusion. Representative images of PDGFR α lineage cells in the LV myocardium at 7, 14, and 28 days of AngII/PE infusion. Asterisks indicate blood vessels. Representative of control: n=3; ablated: n=3 at each timepoint. (B) Immunohistochemistry of PDGFR α at 7 days post AngII/PE infusion. Representative of control: n=3; ablated: n=4.
