

Figure 3, Supplement1

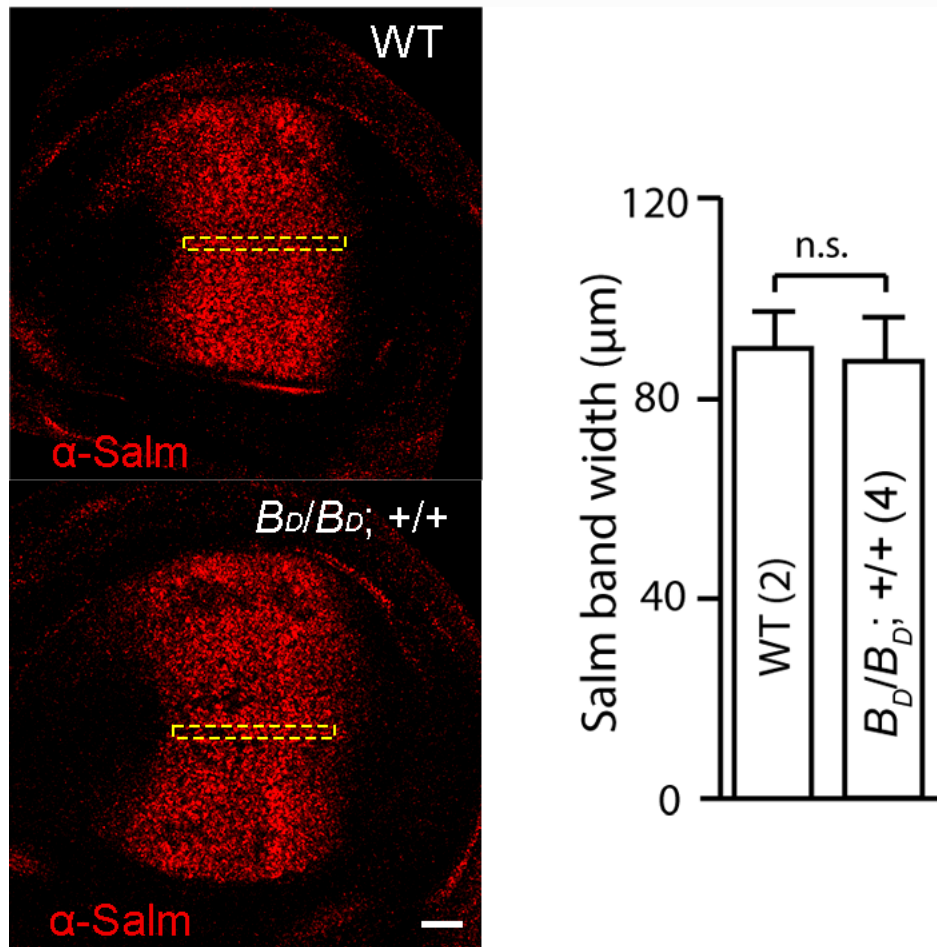

Figure 3-figure supplement 1. Salm expression in *dpp* gene copy number genotypes Images of wing discs stained with α -Salm antibody. Anterior, left; posterior, right. Bar graph shows average width of the Salm band measured in the dashed yellow lined box, which is not statistically significant different in the genotypes with 2 (WT) and 4 ($B_D/B_D; +/+$) *dpp* gene copies. N=8. Scale bar: 20 μm
