

Integrated band intensities by densitometry

	EF1α signal	Normalization factor	PPS signal	Normalized PPS signal	+aTc / -aTc+IPP
+aTc	1110000	0.61	322	528	2.8
-aTc+IPP	1810000	1.00	187	187	

Raw gel images

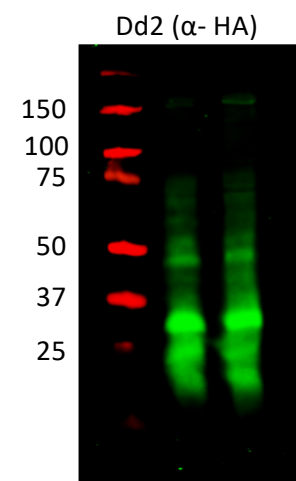

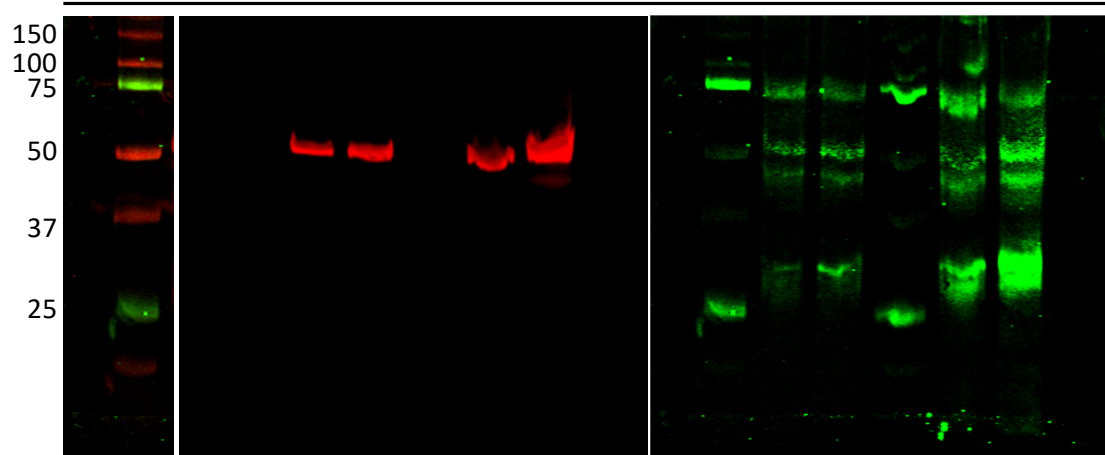

Figure 6- source data 1. Uncropped western blot images of Dd2 parasites with endogenously tagged PPS-HA/FLAG and probed with anti-HA and anti-FLAG antibodies and anti-EF1alpha antibody. The band for PPS was not detected in untagged parental Dd2 parasites.
