

Figure 5–Figure supplement 2

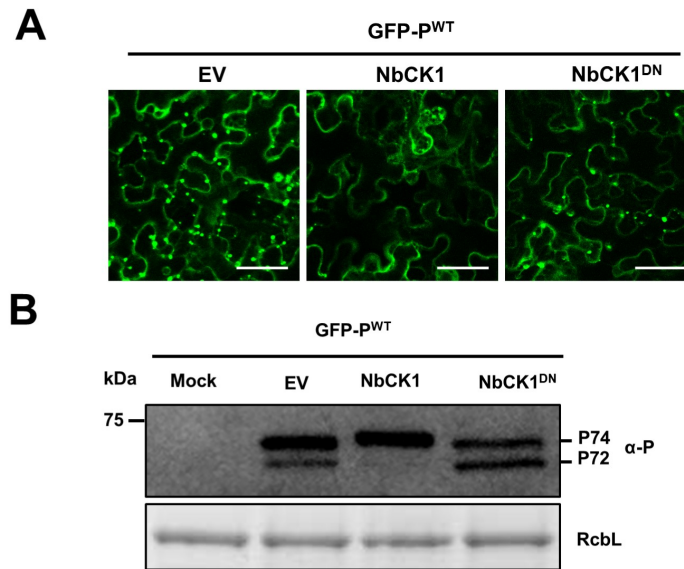

Figure 5–Figure supplement 2. Host CK1 inhibits phase separation of BYSMV P *in vivo*. (A) Confocal images showing subcellular distribution of GFP-P^{WT} co-expressed with empty vector (EV), NbCK1 or NbCK1^{DN} in *N. benthamiana* leaf epidermal cells at 2 dpi. Scale bars, 100 μ m. (B) Western blotting detecting accumulation of GFP-P^{WT} in the leaves as shown in panel A.
