

- mitotic cell cycle process
- Polo-like kinase mediated events
- nuclear division
- PID AURORA B PATHWAY
- establishment of organelle localization
- negative regulation of organelle organization
- Retinoblastoma gene in cancer
- positive regulation of transferase activity
- regulation of meiotic cell cycle
- HTLV-I infection
- Calcium regulation in cardiac cells
- sensory perception of sound
- Melanogenesis
- peptidyl-tyrosine dephosphorylation
- G1/S transition of mitotic cell cycle
- DNA repair
- regulation of proteolysis
