

- HDACs deacetylate histones
- Ub-specific processing proteases
- regulation of gene silencing
- negative regulation of cell differentiation
- tissue morphogenesis
- Pathways in cancer
- sensory organ development
- Nervous system development
- muscle structure development
- brain development
- cellular component morphogenesis
- skeletal system development
- Neural crest differentiation
- ameboidal-type cell migration
- ossification
- Hippo signaling pathway
- transmembrane receptor protein tyrosine kinase sign.
- stem cell differentiation
- Breast cancer
- MAPK family signaling cascades
