

- enzyme linked receptor protein signaling pathway
- muscle structure development
- tube morphogenesis
- tissue morphogenesis
- regulation of cell adhesion
- Pathways in cancer
- positive regulation of protein phosphorylation
- stem cell differentiation
- cell-cell adhesion
- cell morphogenesis
- negative regulation of cellular component movement
- skeletal system development
- Malignant pleural mesothelioma
- positive regulation of cell development
- renal system development
- response to mechanical stimulus
- cardiac chamber morphogenesis
- developmental growth
- homeostasis of number of cells
- positive regulation of apoptotic process
