

- positive regulation of protein phosphorylation
- regulation of cell adhesion
- positive regulation of locomotion
- cellular response to lipid
- Transport of small molecules
- NABA MATRISOME ASSOCIATED
- Ferroptosis
- EGF/EGFR signaling pathway
- organic hydroxy compound metabolic process
- vasculature development
- response to growth factor
- ion homeostasis
- MAPK signaling pathway
- negative regulation of cell adhesion
- reproductive structure development
- Rap1 signaling pathway
- Signaling by Interleukins
- chemotaxis
- response to wounding
- regulation of leukocyte migration
