

- negative regulation of transport
- Signaling by Interleukins
- neurotransmitter metabolic process
- EGF/EGFR signaling pathway
- blood vessel maturation
- NOD-like receptor signaling pathway
- Platelet activation, signaling and aggregation
- enzyme linked receptor protein signaling pathway
- actin polymerization or depolymerization
- VEGFA-VEGFR2 signaling pathway
- regulation of vesicle-mediated transport
- lamellipodium organization
- response to growth factor
- Sarcoglycan-sarcospan complex SG-SPN
- regulation of leukocyte migration
- regulation of proteolysis
- actin filament-based process
- Neutrophil degranulation
- multi-multicellular organism process
- pattern specification process
