

- NABA MATRISOME ASSOCIATED
- Prostaglandin synthesis and regulation
- response to hormone
- positive regulation of cellular component movement
- sensory organ morphogenesis
- negative regulation of cell differentiation
- negative regulation of lipid biosynthetic process
- pattern specification process
- morphogenesis of an epithelium
- Neutrophil degranulation
- Collagen formation
- regulation of fat cell differentiation
- reproductive structure development
- negative regulation of response to external stimulus
- positive regulation of cell death
- Copper homeostasis
- Malignant pleural mesothelioma
- Signaling by Interleukins
- carbohydrate derivative catabolic process
- Interleukin-4 and Interleukin-13 signaling
