

- HDACs deacetylate histones
- Ub-specific processing proteases
- Interleukin-7 signaling
- E3 ubiquitin ligases ubiquitinate target proteins
- Apoptosis induced DNA fragmentation
- TP53 Regulates Metabolic Genes
- cardiac septum morphogenesis
- peptide metabolic process
- Pathways in cancer
- Hippo signaling pathway
- Ca<sup>2+</sup> pathway
- Neuronal System
- mesenchyme morphogenesis
- appendage development
- regulation of neuron death
- telencephalon development
- cell redox homeostasis
- regulation of synapse assembly
- protein localization to mitochondrion
- Amyotrophic lateral sclerosis (ALS)
