

- Malignant pleural mesothelioma
- tissue morphogenesis
- muscle structure development
- cellular component morphogenesis
- skin development
- Hippo-Merlin signaling dysregulation
- enzyme linked receptor protein signaling pathway
- Neural crest differentiation
- Pathways in cancer
- cardiac chamber development
- regulation of morphogenesis of an epithelium
- neurofilament bundle assembly
- regulation of kinase activity
- glial cell differentiation
- telencephalon development
- supramolecular fiber organization
- regulation of anatomical structure size
- ameboidal-type cell migration
- multicellular organismal signaling
- neural tube development
