chemiluminescence

**Figure 3 Source Data 4. Validation co-IP from inducible MB135 cell lines, anti-PRKDC.** Western blot showing anti-PRKDC signal. \* marks correct size band. Blot was physically cut to probe with multiple antibodies, multiple separate blots were imaged in this exposure/file. TOP BLOT (boxed in green) is relevant for this figure and was probed with anti-PRKDC. Signal from ECL only appears in the chemiluminescence channel. Protein ladder appears in white light channel.
