

white light

chemiluminescence

**Figure 4 Source Data 7. Co-IP from dual-inducible MB135 cell lines, anti-pSTAT1(Y701).** Western blot showing anti-pSTAT1(Y701) signal for Figure 4b. \* marks correct size band. Blot is probed with anti-pSTAT1(Y701) to detect the phosphorylated INDUCIBLE MYC-tagged STAT1 or MYC-tagged STAT1-mutant transgene. Protein ladder only appears in the “white light” exposure, signal from ECL only appears in the chemiluminescence channel.
