

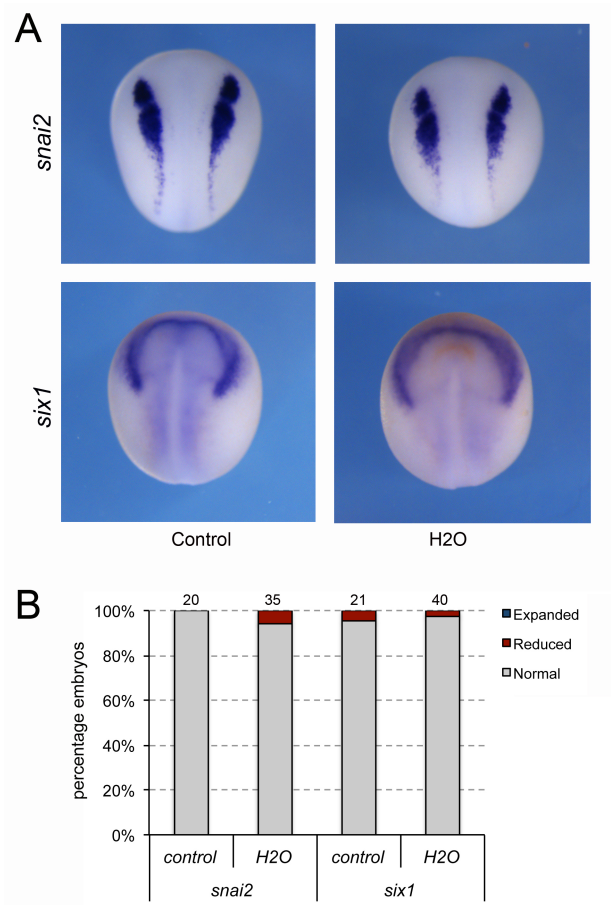

**Figure 2-figure supplement 1**

**Manipulation of the blastocoel fluid does not affect *snai2* and *six1* expression.** (A) The expression of *snai2* and *six1* is unaffected in embryos in which the blastocoel fluid was replaced by 100-120 nl of water at NF stage 9. Dorsal views, anterior to top. (B) Frequency of the phenotypes. The number of embryos analyzed is indicated at the top of each bar.
