

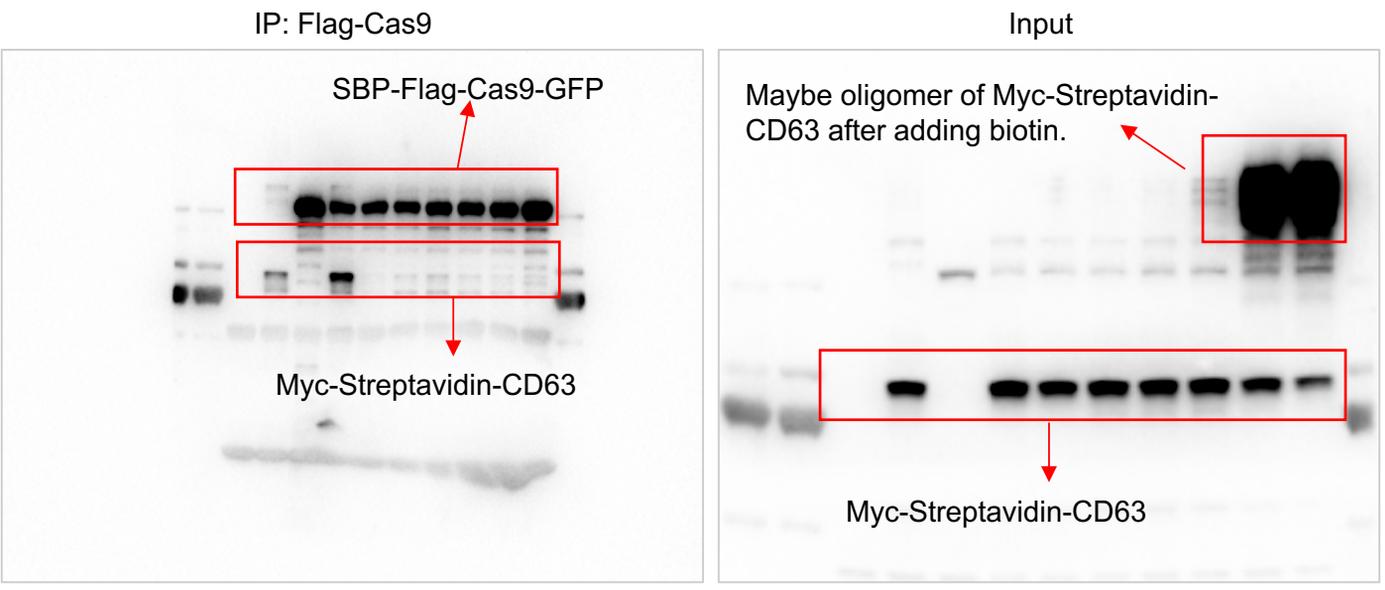

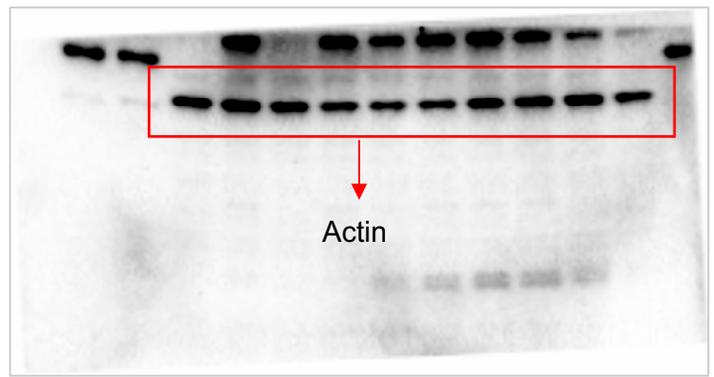

Figure 1-figure supplement 1A

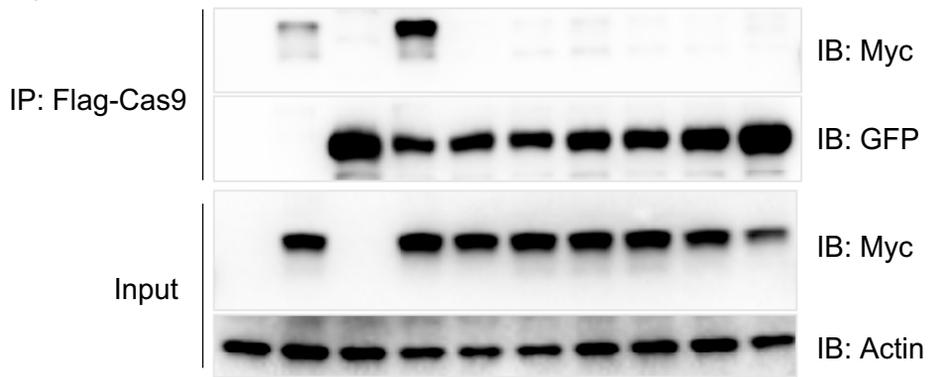

uncropped blots

Note: This blot was first incubated with Myc antibody, and washed by TBST, and incubated with actin antibody. So the myc signal is still there.

	Biotin (uM)	-	-	-	-	10	40	100	200	500	1000
SBP-Flag-Cas9-GFP		-	-	+	+	+	+	+	+	+	+
Myc-Streptavidin-CD63		-	+	-	+	+	+	+	+	+	+

Immunoprecipitation (IP) was performed using anti-Flag and HEK293T cells expressing SBP-Flag-Cas9-GFP and/or Myc-Streptavidin-CD63-mCherry.
