

Figure 2 - figure supplement 1 Oligomerization of (myr-)MAPP T69C. SDS-PAGE gel showing monomer of (myr+)MAPP WT and oligomers of (myr+)MAPP T69C formed upon the interaction with liposomes, stabilized by disulfide bridges under non-reducing conditions . non-red – non-reducing conditions; * monomer, ** dimer, *** trimer. Source data - **Figure 2 – figure supplement 1 - source data.**
