

Figure 6D- Source data 1. Membranes corresponding to Cathepsin B, activated Cathepsin B, Cathepsin D, activated Cathepsin D and Tubulin (as loading control) Western Blots presented in Figure 6D. Samples used in this study are those marked in the rectangle. Sample order is (from left to right in the rectangle):

lane #1: WT BMDMs unstimulated

lane #2: WT BMDMs stimulated with LPS+IFN- γ

lane #3: RBD BMDMs unstimulated

lane #4: RBD BMDMs stimulated with LPS+IFN- γ
