

Figure 5—figure supplement 1 - Source Data 1. Original Western blot membranes corresponding to Figure 5—figure supplement 1, panel A. We used the Page Ruler Plus Prestained Protein Ladder from Thermo Fisher Scientific (Product #26619) in the membranes. The membranes do not include the protein ladder, due to having observed that, sometimes, the anti-VP3 sera cross-reacted with certain bands from the ladder. This explains why in Figure 5—figure supplement 1, the ladder is

shown

separately.
