

Figure 4-figure supplement 1-source data 1. Original membranes (highlighted by red rectangular frames) corresponding to Figure 4-figure supplement 1. The upper and lower bands represented the expression levels of protein CheY-eyfp and the housekeeping protein β -actin, respectively, with bands from left to right indicating the corresponding protein expression levels induced by different arabinose concentrations 0, 0.01, and 0.1 (% , m/v).
