

Western blot analysis showing AARS2 and β -actin protein levels. The top panel shows AARS2 protein levels, with a red box highlighting the bands for AARS2^{WT} and AARS2^{Tg/+} mice. The bottom panel shows β -actin protein levels, with a red box highlighting the bands for AARS2^{WT} and AARS2^{Tg/+} mice. Molecular weight markers are indicated on the right (130, 100, 55, 40 kDa).
